## JS/UIX - Terminal

> open terminal

JS/UIX is an UN\*X-like OS for standard web-browsers, written entirely in JavaScript (no plug-ins used). It comprises a virtual machine, shell, virtual file-system, process-management, and brings its own terminal with screen- and keyboard-mapping.

For an overview of implemented commands have a look at the complete > JS/UIX-Manual-Pages; see also the > Version-History.

The keyboard accepts the US-ASCII character set. As key-mapping depends from your browser, you may have to use the cursor and backspace buttons at the lower right of the terminal. A complete keyboard can be accessed at the lower left.

Compatibility: Netscape 4+, MS IE 4+ and DOM-aware browsers.

JS/UIX is not a free software. For a free to use terminal-interfaces have a look at `mass:werk termlib.js`.

© 2003 `mass:werk`, N.Landsteiner

Alternate key mappings (may depend on system and browser):

- CTRL + SHIFT + [KEYPAD]<4> for left
- CTRL + SHIFT + [KEYPAD]<6> for right
- CTRL + SHIFT + [KEYPAD]<8> for up
- CTRL + SHIFT + [KEYPAD]<2> for down
- CTRL + SHIFT + [KEYPAD]<0> for backspace.

Note/Disclaimer: No data of any kind is transmitted to any kind of server or service. JS/UIX is demo software and provided "as is".

For technical information see the: > JS/UIX documentation.
